Fun, but kind of basic Lego game. I got this since my 4 year old daughter loved the Marvel Super Heroes 2 game. That had been her first and only video game she'd played until Jurassic World. These Lego games are fun for the WHOLE family. Even when people die in the movies, they don't actually die in the Lego games. All the usual items that have been in many other Lego games are here. Nice map with information, blocks to find, side missions to do. It's basic when it comes to characters. There are all of the VERY FEW main people from the movies, but then it's just boring Jurassic Park workers to find around to unlock the rest of the "Mystery" characters. Since they are all just regular people, they get pretty boring. Just a hand full of not-so-special "abilities" to spread all around so you can only use certain people to open certain things.

Pros:

- PRO and CON, each main stories doesn't take forever to beat so you can move onto next movie\story, if the following movie was the one you wanted to see more. Some might see not being able to choose exact movie to jump into from the start a CON.
- Once all movies are beat, then you have all four parks from the movies to explore with side missions.
- Kind of cool being able to be some of the dinosaurs, once unlocked through game play. You have some options in where you can combine some slight looks of dinosaurs, but you CAN NOT make any crazy mutation mixes.

Cons:

- Like mentioned above, You only get to choose to go into Jurassic Park or Jurassic World at the start. The other two movies you have to beat Jurassic Park and then The Lost World opens. Once The Lost World is beat, then Jurassic Park III opens.
- Sometime switching characters doesn't go to who you want, when they are right in front of you.
- BORING characters. Sorry, I guess I'm just too use to the Marvel games.
- Even when you are playing in Free Play, you still can't have 2 of the same characters on the screen. If I want to have 2 of the same guys running around for convenience, then I should be able to.
- It would have been nice to be able to mix the dinosaurs how you wanted to make crazy mutations.
- MANY of the main story missions might have 3 different sections to play in, but if you need to go back to the second sections because you missed a gold block, then you have to play through the FIRST section again just to get to the SECOND section even in freeplay.

I don't know if it was my computer or the game, but a few times I'd be playing on my STEAM Link and my player one would just stop working during the main stories. I'd check my computer and I could move my mouse and once I was able to join the game as the second player, through my computer, but the player one wouldn't work. I had to turn the STEAM Link on and off and the game was right back to playing the way it was suppose to and fortunately the game saved what I had just started so I didn't have to start too far back.

Don't get me wrong, I've had a lot of fun with this game and my daughter has too, but I'm glad I got it on a REALLY GOOD DEAL or I might think I got a little ripped off. IF I had to choose this game or the Marvel games, then I'd go back to the Marvel games without any hesitation.. How about a nice cup of Liber-tea?

Killin' Krauts.. Plays like the budget version of Super Meat Boy.. I Love this game!! The graphics are clean, the controls are simple, and the music is great!

The music builds as you progress forward. There is a rhythm to this game. This game can be frustrating, for me at least since I have NO rhythm.

In the end it's a good buy and a fun addicting game!. For being a short game and just a 'taste' of what may come, I must say I really enjoyed this game. That being said I'll start reviewing it.

GRAPHICS:

- +I like the level design a lot. Very fantasy like and it really immerses you in the game. Keep it like that!
- .. That's about it really.

STORY:

- +The story was decent. Of course you'll be left out with more questions than answers. But the story is good enough for you to play through the entire game.

+I did like them adding side quests, although there are only 1 or 2 it's something that could make this VR game more unique.
-It is very clich\u00e9 and most of it was to be expected before it even happened. I like stories with surprises though this one did not give me one.
+-CAN SOMEONE SHUT THAT B* UP WHEN I AM NOT IN THE MOOD TO CONTINUE THE STORY! Thanks in advance :)

MUSIC:

+ It fits the environment and it is beautifully done!

GAMEPLAY:

Phew okay here comes the interesting one.

+Horses. The horses were weird at first but I loved using it during my playthrough! Of course if you're sensitive about such movements then this game is really not for you.

+Your magical powers can sometimes be quite clunky.

-The boss battle was terrible and confusing. It just doesn't make any sense. I even got him to glitch through a rock :O

Overall it's a good start for a game. I look forward for the full version!

7/10 + 0.1 for being a free game.. For all of you people reviewing these threads to decide to get this content DON'T BUY IT, this quite simply is just a rip off of some already existing weapons and other content. waste of money unless you like throwing your money around for something you won't use.

To save you all time these weapons aren't as good as some of the other weapons in game.. really fun but an annoying game.. The Snathi were a minor race in GC2. I don't know about GC1. It's nice to see them as a galactic power, however what I'd like to see in a race creation system is an expanded version of the avatar creator in the Elemental series. The ships and ship parts are nice especially the Dread Lords ships. Now what about the Arnor?

. A few ATC prep books actually recommend that you play this game for practice! And while it isn't meant to be a simulation it def. works your brain and makes you realize what we do on a regular basis!

Well, apparently no one is playing the game currently. It could be fun though, just wish more players come in the next days\weeks.. It's ♥♥♥♥♥♥ as ♥♥♥♥♥.. An extremely detailed and full-quality experience. You can tell a lot of work went into this. If you're looking for a neat experience for yourself or for showing your friends, then this is what you want.. Very nice game. 10\10 would play again.. Well then time for a review. First off for a new model to be released by a new company can i say well done. The S15 is a beautiful model with decent animations and textures and can be pleasure to drive along any British route. The one problem with this beautiful addon which lets it down which is such a shame is the sounds. They are reclycyed from the n15 king arthur pack which is another great model let down by its sounds. If steam sounds superme can get hold of this model for sounds then this pack would be a 10 out of 10. However due to its sounds it only scores an 8 beautiful model but let down by its sounds. Keep it up Bossman Games you have made a superb engine. RPG + Massive Amount of Customation + Rabbit Holes = Hours of my life delightfully gone.

I got this when it was on sale and I haven't been able to stop playing it since!

To put it another way, if I could go back in time and retain the knowledge that I have now, I'd be more than happy to pay full price.

As an unemployed recent graduate, that means a lot.

\$12.99 can buy a lot of food.
